

DocTalk utilizes wireless technology to communicate patient information between physicians and administration efficiently using a Pocket PC. This technology is utilized for Hospital Census, Dialysis Unit Rounds and Office Visits capturing charges, patient sign out and follow up information for physician to physician communication. DocTalk can help your practice increase efficiency and reduce overall expenses.

**ADVANCED INFORMATION
SHARING TECHNOLOGY**

*Physicians Save Time, Increase Profits
and Simplify Documentation.*

DocTalk is used with a wireless hand-held that conveniently fits in your pocket. The device replaces the need for paper that is often cumbersome to track and automatically stores pertinent patient information in the computer system.

3003 N. CENTRAL AVENUE, SUITE 400
PHOENIX, ARIZONA 85012

The Technology is Currently Utilized for Managing:

- Hospital Census
- Dialysis Unit Rounds
- Office Visits
- Patient Follow-up
- Physician to Physician Sign Out

Additional Uses Include:

- Physician Schedule View and Retrieval
- Coding and Documentation Guidelines
- Standardized and Individual Contact Directory
- Dictation/Computer Instructions for Units/Hospital
- Exam Check List
- Physician Directory

Some Advantages of DocTalk to the AKDHC Physician Practice Include:

- Physician Time Savings of 1 Hour Per Day Per Physician
- Improved Patient Care via Appropriate Physician Sign-out Information
- Reduction in Labor Force of 4 Full Time Employees
- Reduction in Cellular Phone Costs
- Reduction in Answering Service Expenses
- Increase in Early Vascular Access Placement
- Increase in Office F/U Visits from Hospital
- Increase in Capture of G-Codes from Dialysis Facilities
- Ability to Downgrade Quality of Home Fax Machines and Associated Supplies
- Decreased "Days in Accounts Receivable" by 5 Days

DOCTALK CAN HELP YOUR PRACTICE INCREASE EFFICIENCY AND REDUCE OVERALL EXPENSES.
